Personalized Bacteria Protection Kits Available to All Purler Academy Wrestlers this Summer

Rochester Hills, MI...Purler Wrestling Academy, the nation's largest wrestling school, and CSG/SportsCoatings, wrestling's leading provider of long-lasting antimicrobial treatments, are proud to announce that personalized Bacteria Defense Kits (Bac-D) will be made available to every Purler Wrestling participant this summer.

"Before our busy camp season started we made sure our mats and other community equipment was treated with CSG's antimicrobial technology," said Nick Purler, Owner of Purler Wrestling Academy. "This personalized kit that CSG and Hibiclens created with wrestlers in mind is the ultimate proactive solution to skin ailments as far as I'm concerned."

Designed by CSG to give every wrestling camp participant a way to treat their personal items with the same long-lasting antimicrobial technology that is used on Purler's mats and equipment, the Bac-D Plus Kit includes three products that will eliminate harmful bacteria and germs and provide long-lasting protection from future growth of bacteria. This comprehensive, personalized kit will treat head gear, shoes, and washable fabrics. The same innovative, products included in the Bac-D Plus Kit are used by prominent organizations such as the New York Yankees, USA Olympic Basketball, the U.S. Military, and University of Missouri Wrestling.

"We created the Bac-D Plus Kit with wrestlers in mind," said Kevin Smith, Vice President of Wrestling Sales, CSG. "Purler is a great camp to kick off our campaign to make these kits available to every young wrestler across America. We've gone to great lengths to make sure these Bac-D Plus Kits can be easily ordered directly from any coach's website."

As a bonus to the wrestling community, Hibiclens® antimicrobial skin treatment will also be included in the Bac-D Plus Kit. Using Hibiclens antimicrobial skin cleanser will help reduce the presence of bacteria that potentially can cause skin disease by fighting harmful bacteria for hours. The following are additional benefits that Hibiclens antimicrobial skin treatment provides:

- Bonds to the skin and continues to actively kill bacteria for up to 6 hours after washing and rinsing.
- Broad spectrum skin protection – effective against bacteria, viruses and some fungi.
- Gentle to skin, safe for frequent use.

Along with Hibiclens, the Bac-D Kit Plus includes the following CSG products:

16 oz bottle of FabricAide™

- Applied through the wash, FabricAide works 24/7 to inhibit the growth of a wide array of bacteria, mold, and fungi.
- One application lasts a minimum of 30 washes.
- Safe, non-toxic, hypoallergenic, and non-sensitizing to human skin.
- Odorless.
- Will not create adaptive organisms or 'super bugs'.
- Proactively eliminates odor, staining, and deterioration caused by microbial contaminants.

32 oz bottle of SurfaceAide® XL

- Extremely long-lasting antimicrobial surface treatment that continually fights the growth of bacteria.
- One application lasts a minimum of 90 days.
- Easy spray on application.
- Safe, non-toxic and non-sensitizing to human skin.

32 oz. bottle of SurfaceClean®

- Very effective cleaner disinfectant designed to work in synergy with SurfaceAide XL antimicrobial technology.
- Kills 99.9% of germs and bacteria including:
 - MRSA
 - Staph
 - H1N1 Virus (Swine Flu)
 - Influenza A
 - Hepatitis

CSG is America's leading provider of long-lasting antimicrobial products, treatments and services. CSG offers products and services for any facility. Visit www.csgrp.com or call 516.729.8241 for more information on CSG products.
